Tree Books

October 2026

This varied collection comes primarily from the libraries of **Brian Byrne**, retired engineering lecturer and former Vice President of the Bradford Botany Group, and **Hugh Kemp**, artist, tree enthusiast and conservation pioneer. With his wife Jane, Hugh helped create the celebrated woodland at Snaizeholme near Hawes, transforming a harsh upland landscape into a rich habitat for wildlife, particularly red squirrels, and a destination enjoyed by visitors from across the region.

The descriptions in general are concise, often abbreviated versions of the website entry. Please see the website listing for more details and photos.

After the publication information you will find the condition of the book in its short form, e.g. Very Good/Fine, which indicates, initially, the overall condition of the book and, where applicable, after the slash, the overall condition of the dust jacket. Where there is no slash and subsequent condition, then this indicates that the book does not have a dust jacket. A 'Very Good' book may have a Fine interior but a much less well-preserved binding, or vice versa; see the description for details.
The assigned condition takes into consideration the age of the book to some extent.

FFEP = front free endpaper (loose); FEP = front endpaper (pasted to front board); OOP = out of print; DJ = dust jacket.
